

> Components and Solutions for Medical Technology

SCHURTER products meet diverse requirements in terms of durability, reliability, safety, shock resistance, tight conformance, hygiene, ease of use and a high degree of functional integration. We focus on components and systems ensuring the safe supply of power and user-friendliness of medical equipment.

Core Competence

Success for and together with our customers is our permanent incentive. We are accustomed to being innovative to meet challenges in diverse markets. Our well-organized global network of regional representatives and distributors ensures that our customers will benefit from a high degree of solution-based competence and short delivery times.
